THERMOPATCH LABELS: SIMPLY EFFECTIVE

Cost effective and reliable: the best quality labelling systems of Thermopatch. For decades we have manufactured identification systems for hotels, health care and laundries all over the world. The labelling machines and tapes produced by Thermopatch are as easy to use as they are effective, guaranteed for the highest quality and durability. Interested? Discover the many possibilities of our innovative products.

Thermopatch – since 1934

In 1934 Thermopatch started supplying products for textile repairs in the United States. This was quickly followed by the introduction of the first labelling systems. Through continuous innovation, responding to demands from the marketplace, the product range has been greatly extended and now includes high quality transfers and logos for corporate identity.

In 1959 the first office in Europe was opened, today the group operates worldwide and offers the best quality labelling systems, heat seal equipment, emblems and transfers available on the market.

QUALITY AND
DURABILITY
GUARANTEED

TEXTILE CARE

Laundries process thousands of items of workwear, flatware and other textile on a daily basis. All these different kinds of fabrics are developed for intensive use and are designed to withstand multiple washings. These requirements also apply to the labels: a name label or a company logo has to be as durable as the textile itself. Thermopatch guarantees that its specially developed labels will ensure a perfect adhesion with the textile. Either for a permanent or a temporary result; whatever is required, Thermopatch has the perfect solution.

TEXTILE CARE

Labelling in the textile care: a clean task for Thermopatch

Textile comes in all sorts of sizes and qualities, and with all kinds of washing instructions. Whether it's washing, dry cleaning or ironing; for every type of processing Thermopatch offers the most appropriate products.

An unrelenting torrent of laundry from all kinds of businesses enters industrial laundries on a daily basis. Whether its uniforms, overalls or flatware: everything has to be washed and returned clean, as quickly as possible, to the user. Whatever the wash process: Thermopatch labels will endure.

Workwear

HiQ tape – flexible heavyweight

This strong but supple tape is available in several colours in continuous or die-cut rolls. It can also be pre-printed to your requirements. Combined with our HiQ ink ribbons readability of the labels is guaranteed through many wash cycles.

To be used i.c.w. HiQ-a4+ and/or HiQ-EOS-1 printers.

Hytex – additional assurance

Hytex is similar to HiQ but has an added self-adhesive layer. Advantage: a Hytex label can also be applied to difficult spots on the textile without the chance of displacing it. Suitable for any kind of sensitive material. Extremely durable and an excellent readability.

To be used i.c.w. HiQ-a4+ and/or HiQ-EOS-1 printers.

Flatware

Initex-tape – thin but strong

For more sensitive types of textile in mind, Thermopatch has developed Initex. This wafer thin material can be applied at lower temperatures and has a shorter sealing time. Despite this it can be washed up to 95°C.

To be used i.c.w. HiQ-a4+ and/or HiQ-EOS-1 printers.

Mediron – thermal flexibility

Suitable for permanent sealing to flatware and personal garments. This tape, which can be ironed, is thinner yet remains strong and is ideal for printing your own labels when used with the Make Your Mark software.

To be used i.c.w. HiQ-e4, HiQ-a4+ and /or HiQ-EOS-1 printers.

Personal clothing

Med-Low – Convenience and quality

Alongside Mediron, for use with sensitive personal clothing Med-Low is a good alternative. The advantage of this flexible tape is that it can be applied using a normal heating iron – the glue will melt at low temperatures. Med-Low is available in die-cut as well as continuous tape and is washable up to 40°C.

To be used i.c.w. HiQ-e4, HiQ-a4+ and /or HiQ-EOS-1 printers.

Thermoseal tape

This temporary marking tape is available in two different widths. Sorting by colour is made very easy through a choice of the 11 different colours.

To be used in conjunction with the Thermoseal Y-151 and Y-300 temporary marking machines.

Our latest technical development now enables us to print thermic transfermedia like HiQ much faster and more cheaply than traditional silk screen printing. Even photographic images are possible.

TEMPORARY OR
PERMANENT LABELS:
WE TAKE CARE OF IT

HEALTHCARE

Workwear, flatware and all kinds of textile are required to meet the strictest of hygiene norms in the health sector. In order to be able to supply clean washing to staff and patients every day, good logistics are necessary to make this possible. The automated labelling systems offered by Thermopatch assist the process. Our machines are the result of practical experience over many years and extensive research. Thanks to our label systems the integrated washing process can be monitored so sheets, towels and workwear can be processed quickly. Thermopatch takes care to ensure an optimal wash result.

HEALTHCARE

Thermopatch labelling systems in health care: one care less!

Bedding, surgery garments, workwear and towels: all healthcare textile is sorted and washed 24/7. To be able to process everything flawlessly a labelling system is of the greatest importance. It is the only way to control and distribute clean textile. This is where Thermopatch enters the picture with labelling systems that help ensure optimal processing.

Healthcare workwear and other textiles are not only required to be comfortable and durable, they have demanding quality standards and must adhere to strict washing instructions. For decades Thermopatch produced the highest quality of labels which meet these standards.

IDENTIFIABLE,
MULTIFUNCTIONAL
AND FLEXIBLE

HOSPITALITY

The world of hospitality is all about personal attention and an eye for detail. Guests need to feel valued as individuals; they like to be able to address their host or hostess by name. A name badge enhances engagement with the employee and customer. More and more businesses are acknowledging their usefulness.

Thermopatch offers a wide range of badges for businesses in hospitality to bring that personal touch to their service.

HOSPITALITY

The wearing of high quality badges is a very effective way to enhance the professional image of a business. The badge personalizes the organisation, enhances brand awareness and we believe improves service. Thermopatch offers many different possibilities for image enhancement which will improve your customer relations for the future.

16

Badges

More and more businesses today recognise the value of using a badge. In addition to exhibitions, hospitals, supermarkets and department stores are now using badges more often. The badges offered by Thermopatch can be imprinted with the company logo. In the transparent window a nametag can be inserted, designed and printed by you. There is a choice of a single line, double line or even multi line nametags. The badges are available in several sizes. The badge is fitted with a combi clip as standard, but other fittings are possible. Due to the transparent text windows the badges are reuseable.

Temporary attachment – laundry service

A hotel guest, who makes use of the laundry service, expects his or her own garments to be returned clean and on time. With help from the temporary Thermopatch labelling system, hotels all over the world offer this security every day to tens of thousands of their guests.

Thermoseal tape

This temporary marking tape is available in two different widths. Sorting by colour is made very easy through a choice of the 11 different colours. To be used in conjunction with the Thermoseal Y-151 en Y-300 temporary marking machines.

17

WE OFFER
CUSTOM MADE
APPAREL

APPAREL

With every garment bought there is normally a care label attached which contains essential information about size, type of textile and how to wash and iron correctly. Although we may think such care labels are standard at Thermopatch they certainly are not. We supply high quality tape for making care labels yourself. Quickly and easily you can make your own clear text with or without adding your own brand or logo. Or you may choose our flexible textile transfers to seal the most important information onto your garments. Thermopatch offers custom made apparel.

APPAREL

4

Apparel appears in many shapes, sizes and colours. Therefore it is important to attach the right information and washing instructions to each garment or any other textile item. The care labels and textile transfers by Thermopatch are unique where quality and appeal are concerned. Also the making of the labels themselves is easy, quick and efficient, always showing clear print of your texts and logos.

Deco-Print dP2000T – colourful marking

This machine renders the sealing or sewing on of tags obsolete. With the Deco-Print you print a crisp logo or text directly onto textile. With the added typeset box you can assemble your own text, slide it into the type bars on the machine and start marking immediately. It is even possible to perform multicolour printing. Also suitable for heat sealing of transfers, single or on roll.

Thermomark/Thermotrans – easy to use

Quick, cheap and easy to use; that is Thermomark and Thermotrans. The properties are similar between both products, but Thermomark will be supplied on rolls, Thermotrans as single transfers. The only difference is that Thermomark is washable up to 90°C, Thermotrans up to 60°C.

Barcode labels – reliable and flexible

With the aid of labelling software produced by Thermopatch you are able to print barcode labels or any other necessary information. Make your Mark is an economical and very reliable textile registration system. It is available in a stand-alone version or through a local network.

Plytex labels & die-cut tape – quick and exact

Two simple and effective products, ideal for use in health care and laundries. In only four steps you can print your text onto the self-adhesive Plytex-labels or die-cut tape. For maximum benefit use in combination with our labelling software Make your Mark or the more advanced BarTender. You save not only time but diminish the chance of errors with Plytex and die-cut rolls.

Plytex to be used i.c.w. LQ-690, die-cut tape i.c.w. HiQ-a4+, HiQ-e4 and/or HiQ-EOS-1 printers

Care labels

Every garment has a care label, detailing information about washing, drying or ironing; Thermopatch supplies high quality tape to make your own care labels with very clear printed user instructions and/or logo's.

HiQ thermal transfer tape and inkribbon – perfect combination

Especially designed for use with Thermopatch printers. HiQ tape is supple yet strong, supplied as either continuous or die-cut tape it can withstand even the severest washing processes. Almost all current textile qualities can be labelled using HiQ tape and ink ribbon. The tapes can be custom printed with your logo or text in any colour you desire.

OUR LABELPRINTERS AND HEAT SEAL PRESSES

Labelprinters for permanent marking

Thermopatch offers the widest range of labelprinters suitable for any type of user. Whatever model you choose, the printers are simple to operate and guarantees reliable and consistent results for many years.

... HiQ-a4+ – versatile and reliable

This thermal transfer printer cutter is available in several different versions which makes it very versatile. The base version works without a cutting device and is suited for die-cut tapes. The cutter version gives the possibility to work with continuous tape. The version with the combi cutter pre-cuts the labels partially at first and finally after finishing the printing command. In addition, the HiQ-a4+ can be fitted with a winder and a stacker. A large display shows the commands to be executed and thanks to the clear icons, navigating the printing program is easy. Suitable for use with HiQ tape, Initex tape, Hytex labels and Mediron label tape.

Best for the production of labels to be sealed onto workwear, flatware and personal garments in any business.

EPSON LQ-690

The Epson LQ-690 is a user friendly dot matrix printer giving optimal performance in speed, reliability and user friendliness. Graphical data can be printed very quickly in a Windows environment. The compact design enables placement and use in almost any location. The versatile Epson LQ-690 is suitable for printing Plytex and die-cut tape. Suitable for the production of labels to be sealed onto workwear, flatware and personal garments in any businesses.

... HiQ-EOS-1 – the perfect touch

The best technology for a competitive price. The HiQ-EOS-1 enables you to print without the need for a computer. Previously designed labels can be stored on the internal memory or an USB stick. This all-round printer is available in 200 – and 300 dpi resolutions. To be used with HiQ tape, Hytex labels or Mediron. Suitable for the production of labels to be sealed on workwear, flatware and personal garments in any businesses.

... HiQ-e4 – best combination

With the practical and user friendly HiQ-e4 printer, Mediron die-cut tape and our label printing software Make Your Mark, you have the best combination in house. You can easily design and print your own high quality labels in no time at all. Applying the label, using a Thermopatch heat seal press, guarantees a perfect result. Suitable for Mediron and Med-Low. Especially suitable for marking of personal garments and flatware in health care and care homes.

Label machines for temporary marking

Personal garments sent to the laundry service, need to have some form of temporary identification. Thermopatch offers an easy and effective solution.

Thermoseal system Y-151 – smart one liner

The Y-151 is a fast and efficient all-in-one system that prints, cuts and seals. It can print text up to twelve characters on one line. And through the use of coloured tape it helps make garments sorting easier and thus saves time and money. The labels remain firmly attached throughout the wash process, but can easily be removed after cleaning. Thermoseal tapes are available in 11 different colours.

... Thermoseal system Y-300 – text and barcode in one

As the big brother of the Y-151 the Y-300 also enables the printing of barcodes. Now you can print text as well as a barcode on one label. Ideal for laundries and dry cleaners who use a barcode system and want the maximum flexibility from their labelling machine. The Y-300 also uses Thermoseal label tapes, which are available in eleven colours.

Heat seal presses

Our wide range of durable, state-of-the-art and ergonomically designed heat seal machines are designed for applying emblems, labels, mending materials, transfers, and other heat sealable materials. Combined with our high quality heat transfers our heat press machines allow you to embellish and brand your apparel with complete flexibility and ease.

...NL-14-PRO – fast, energy saving

The NL-14-Pro is a convenient table top model for heat sealing purposes, including a foot pedal and a safety bar. The key features of this machine are speed and energy saving. An integrated control panel provides all necessary information to the user.

NL-15-R & SQR Mammoth – reliable heavyweight

A clever combination of advanced technology and modern ergonomic design. This heat seal press works rapidly and will automatically switch to an energy saving mode when not in use. The Mammoth is pneumatically driven by compressed air and is best suited for processing large volumes. Available with round or square press platens.

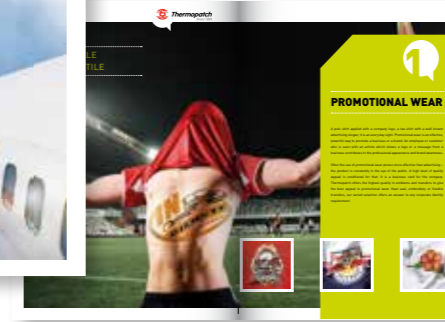

...HS-4-C Beaver – fast and energy efficient

A machine fitted with a ceramic heater which can seal labels, patches, transfers and emblems quickly and simply. Extremely well suited for healthcare and garment suppliers.

Penguin HS-21-SQR – double productivity

Sealing small to middle sized volumes? The HS-21 Penguin is the machine that you are looking for. Thanks to the system of two platens you can quickly seal labels, patches, transfers and emblems. With a start-up time of less than a minute working more efficiently is hard to imagine.

Apart from label products Thermopatch offers a wide choice of corporate identity products and larger heat seal presses. More information about our transfers and equipment can be found in our brochure "Identity products".

Labelling software – quick & easy

Ease of use means for Thermopatch the ability to quickly create your own labels. For this you need software that is self-explanatory. For this purpose Thermopatch offers the following software:

Make Your Mark – ready, set, print

Labelling with Make Your Mark is easy and straightforward. The software offers a wide choice in type fonts, symbols and images. In no-time you can make creative layouts for your own labels to be printed.

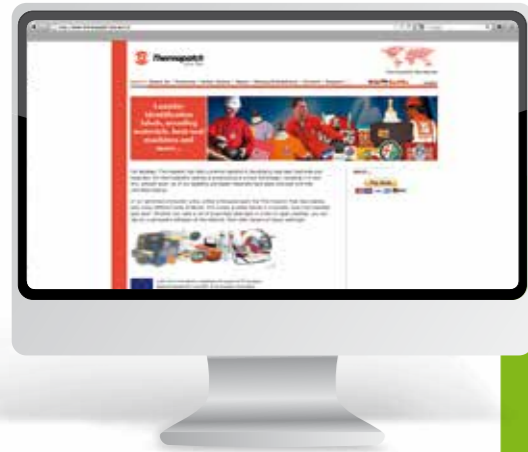

BarTender – powerful and creative

The ideal labelling software for the demanding user. You have a wide range of layouts, the program is easy to use and generates quality labels in no time.

Labels – simply enhanced

Continuous or die-cut tape can be pre-printed by Thermopatch with a design or text of your choice, in any colour(s). By using your software program you can create your own labels by simply adding a name, a barcode or a symbol. There is a wide choice from type fonts, text positions and sizes.

SERVICE

Thermopatch: the best choice

We are sure that you will be convinced of our quality and the diversity in labelling products that we have to offer. Do you want to know more about what services and products Thermopatch can provide? Have you questions about labelling or garments identification, then make an appointment today.

Advice and information

Quality and speed are our most important core principals. We do everything to provide optimal service to our customers. Our sales advisors are fully trained in our product range and can provide advice to you so the best choice can be made to suit your requirements.

Thermopatch offers a wide range of products. Because of this it is important that you will have yourself informed and advised correctly. At www.thermopatch.com you can find more information on all Thermopatch products and an overview of our establishments.

Thermopatch webshop: always online

As a customer of Thermopatch, you can order pre-printed products very easily via our webshop. A major feature of the webshop is that you can build your own personal library of designs. This makes the reordering of a design even easier, it only takes one click to place the order.
